The Rotary Bin Washer is specifically designed to wash all types of large food and waste containers thoroughly, efficiently and economically.

Standard Features

- One person operation
- The bin is rotated through an indexing pattern that is P.L.C. controlled to give infinite cycle variability.
- With its indexing rotation and efficient spinning wash pipework, the rotary bin washer ensures all internal and external surfaces are thoroughly cleaned.
- Rotating spinning jets for complete wash coverage.
- Stainless steel construction throughout.
- Multiple pre-programmed wash cycles.

Optional Equipment

- Rinse booster tank with pump
- Access ramp if machine is floor mounted
- A pit mounted option is also available
- Two door option for pass through operation
- Choice of heating – steam, gas, electric
- Stainless steel extract fan
- Wash and rinse detergent dispenser
- Trolley for smaller wheeled bins
- Conveyor feed and discharge
- Automatic bin sanitizer
- Fragrance spray facility
